New Medicine?

Ask Your Pharmacist

1. WHY should I take this medicine?

Understand what the medicine is for help you to *visualize* how the medicine helps on your sickness and the *importance* of the drug.

2. Is the medicine SAFE for me?

Make sure Your pharmacist know:

- All the *Medicine* you taking
- Any *Drug Allergy* You have
- Any *Other illness* You have
- If you are *nursing, pregnant, or planning to get pregnant*

3. HOW should I take my medicine?

Most medicines have different way of consuming, ask questions such as:

- How *often* do I take the new medicine?
- Before, after, or with a *meal*?
- Is there anything I should not do, such as *driving*?

4. How LONG should I take it?

Some medicines should be stop after the symptoms gone and some are not. Ask questions such as:

- How I know if the medicine is *working*?
- When do I need to *stop* the medicine?

5. What are the SIDE EFFECT?

Know the side effects so that you can detect it if it happened, Ask question such as:

- What side effects might I have?
- When should I call the doctor about a side effect?
